Introduction to A/B Testing

28-29 September 2023

Overview

A/B testing is a powerful tool for product development and decision making. It is used to compare two versions of a product or service to determine which one performs better. In this workshop, we will learn how to use A/B testing to make data-driven decisions. We will start with a refresher on data analysis and statistics, and then dive into Bayesian statistics and A/B testing. We will learn how to implement A/B testing in Python using PyMC, and discuss various factors that can impact the test result. By the end of the workshop, you will be able to use A/B testing to make data-driven decisions in your projects.

Learning Objectives

- Understand the basics of Bayesian A/B testing
- Be able to implement Bayesian A/B testing in Python to solve real-world problems
- Be able to analyse the imact of sample size and prior beliefs on the results of A/B testing
- Be able to communicate and explain results to non-technical audience

Prerequisites

- Basic knowledge of Python
- Basic knowledge of statistics

Getting Started

Explore the workshop repository and gather your resources for the quest!

:warning: Ensure you have installed the workshop virtual environment for the hands-on sessions. You can download the workshop environment file workshop.yml from here and find the installation instructions here.

Agenda

Day 1

Introduction to the workshop: (8:30 - 9:00)

Morning Session: Data Analysis and Statistics (9:00 - 12:00)

- Objective: Refresher on data analysis with Python and statistics.
- Agenda:

```
9:00 - 10:15 : Data Analysis using Python
10:15 - 10:30 :
10:30 - 11:45 : Statistical Distributions & Inference + Quiz
11:45 - 12:00 : Q&A
```

Afternoon Session: Bayesian Statistics and A/B Testing (13:00 - 16:00)

- Objective: Discover the power of Bayesian thinking and its role in A/B testing.
- Agenda:

```
- 13:00 - 14:15 : Bayesian Statistics - 14:15 - 14:30 : - 14:30 - 15:45 : (I) Bayesians vs Frequentists (II) Introduction to AB Testing + Quiz - 15:45 - 16:00 : Q&A
```

Day 2

Morning Session: Deep Dive into A/B Testing (9:00 - 12:00)

- **Objective**: Dive deeper into A/B testing concepts and methods.
- Agenda:

```
9:00 - 10:15 : A/B Testing in PyMC
10:15 - 10:30 :
10:30 - 11:45 : Hands-on Session + Quiz
11:45 - 12:00 : Q&A
```

Afternoon Session: Implementing A/B Testing (13:00 - 16:00)

- Objective: Apply your newfound knowledge to implement A/B tests.
- Agenda:

```
-13:00 - 14:15: Hands-on Session -14:15 - 14:30: -14:30 - 15:45: Hands-on Session -15:45 - 16:00: Q&A
```
